

Packages - Bug #3395

[ruby] Requires rubygems, which conflicts with your-freedom

Description Found myself unable to update because many packages depend on ruby, including parabola-hackers, and ruby depends on rubygems. Can the package in libre be updated to remove this dependency now that it's been blacklisted in your-freedom?

I have the same problem:

```
:: your-freedom and rubygems are in conflict. Remove rubygems? [y/N] y
error: failed to prepare transaction (could not satisfy dependencies)
:: removing rubygems breaks dependency 'rubygems' required by ruby
```

related to [#1035](#) via [#2601](#)

this should be fixed now - the new 'ruby' package no longer depends on 'rubygems' - it is still unclear what the fall-out may be - for some reason, arch's 'ruby' has depended on 'rubygems' since about 3 years ago - do i IIRC, the `rubygems` binary was in the 'ruby' package before that? - perhaps a future bug report will make that reason clear

i noticed one annoyance (probably minor) - every CLI command warns on STDERR: "RubyGems were not loaded"; but ruby works nonetheless

```
$ ruby -e 'puts "hello"'
`RubyGems' were not loaded.
hello
```

Some programs still give problems:

```
`RubyGems' were not loaded.  
/usr/bin/lolcat:9:in `require': cannot load such file -- rubygems (LoadError)  
  from /usr/bin/lolcat:9:in `'
```

clarintux - those errors are covered by the two sub-tasks

- Bug [#3405](#): [various]: RubyGems were not loaded
- Freedom Issue [#3406](#): [various]: `require': cannot load such file -- rubygems (LoadError)

any examples of "rubygems (LoadError)" will need to be investigated and treated or deleted, on a one-by-one basis - [#3406](#) already mentions 'lolcat'

'rubygems' was patched and re-instated - so this specific problem is fixed now - just waiting on the sub-tasks now

can people check those:

- `RubyGems' were not loaded.
- `require': cannot load such file -- rubygems (LoadError)
