I don't know if it's the same problem, but on my computer I have the following problem:

it probably is the same; but it was fixed for x86_64 - what is your arch? - is it a non-systemd system?

I'm using systemd on x86_64.

The message is that libxfce4ui needs xfce4-session 4.18.2, but the current registered version of xfce4-session was 4.18.1.
https://www.parabola.nu/packages/extra/x86_64/xfce4-session/

Is everyone using xfce4 without problems?

If so it may be a problem specific to my computer

i see the confusion now - arch has different versions of libxfce4ui and xfce4-session - it looks like the packager did not notice that?

the arch PKGBUILD is pkgver=4.18.2 - but that package is not actually in the arch repos
