NOTE: quassel may also need to be added to this list - it is pinned to qt5-base via qt5-webkit; but that does not ensure that it will work with the upgraded qt5-base

Hi,

qt5-base was upgraded to 5.15.11, a new rebuild is needed:

```
:: installing qt5-base (5.15.11+kde+r134-1) breaks dependency 'qt5-base<5.15.11' required by python-pyqt5
:: installing qt5-base (5.15.11+kde+r134-1) breaks dependency 'qt5-base<5.15.11' required by qt5-styleplugins
:: installing qt5-base (5.15.11+kde+r134-1) breaks dependency 'qt5-base<5.15.11' required by qt5-webkit
```

Thanks!

x86\_64 is in the build queue - i actually started on this 3 days ago with the armv7h package - it had failed to build for many months now; and each

build takes 3 days to (almost) complete and fail again
