

Packages - Packaging Request #3450

Bug # 3334 (confirmed): Make aarch64-linux-gnu-gcc work again on armv7h

[uboot4extlinux-sunxi]: olimex teres build recipe

2023-02-25 11:21 PM - bill-auger

Status:	in progress	% Done:	0%
Priority:	bug

Category:			
Description			
tracking progress of olimex teres (A64 - A53)			
libera:kreyren was able to boot the teres with an archarm aarch64 system - parabola does not yet have a complete aarch64 system - however we believe that it should be able to run the armv7h system, as did the pinebookpro (RK3399 - A72) - that would be the shortest path to success ATM			
we have a working PKGBUILD for uboot4extlinux, not yet published - stay tuned!			

History

- #1 - 2023-02-25 11:26 PM - bill-auger
- Tracker changed from Porting to Packaging Request
- #2 - 2023-03-03 11:39 PM - KREYREN
- File statement.url added

I am abandoning this issue, see attachment for rationale
