- Status changed from unconfirmed to not-a-bug

there was an open bug report about this already - i forgot to mention that on the mailing list - i just closed the bug report a few minutes ago - the conflict is resolved now

again though, i will stress the point from the mailing list - this situation is not a "error", per se - the conflict is expected and desirable - that is pacman doing it's job, by protecting other programs from breaking, which is likely to happen, if all of the gstreamer packages are not upgraded together

'gst-plugins-bad' needs to be upgraded every time gstreamer is upgraded - it is explained better on another ticket ([#3438](#))
