[epiphany]: v43 broken with nonsystemd

2023-03-15 12:42 AM - bill-auger

Status:	fixed	% Done:	0%
Priority:	bug		
Assignee:	bill-auger		
Category:			
Description			
console just spews these errors repeatedly			
<pre>(WebKitWebProcess:2): GLib-GIO-CRITICAL **: 20:38:48.511: g_dbus_connection_get_unique_name: assertion 'G_IS_DBUS_CONNECTION (connection)' failed</pre>			
<pre>(epiphany:23243): epiphany-WARNING **: 20:38:48.514: Web process crashed</pre>			
maybe dbus needs an update or tweaking?			

History

#1 - 2023-03-15 12:44 AM - bill-auger

- Subject changed from [epiphany]: broken with nonsystemd to [epiphany]: v43 broken with nonsystemd

v42 still works with nonsystemd, so i moved it from [libre] to [nonsystemd], to make room for v43 in [libre], which works fine with systemd

#2 - 2023-03-24 02:05 AM - bill-auger

- Status changed from confirmed to forwarded upstream

i messed with this quite a bit - i think it is a bug upstream; so i necro-bumped a BR that was opened a few months ago by a slackware user - that BR was closed, stating that the problem was in webkit; but the webkit BR was also closed with a fix months ago (several webkit versions ago) <https://gitlab.gnome.org/GNOME/epiphany/-/issues/1856>

#3 - 2023-04-03 01:27 AM - bill-auger

- Assignee set to bill-auger

- Status changed from forwarded upstream to in progress

turns out, the problem was not in epiphany or webkit, but in libportal - the bug is supposedly fixed upstream; but libportal has not had a release since then - i forked the package in [nonsystemd], and applied an emergency patch for now

#4 - 2023-04-03 02:17 AM - bill-auger

- Status changed from in progress to fixed
