Description				
Openrc in Parabola repository was upgraded in 2020 but openrc in Arch User Repository was updated in 2023. Is it a problem to update the package to newer version?

Hi, there's nothing wrong with newer versions. It's just that I've not been very active ultimately in Parabola, I apologize. Starting from mid April I plan to restart my packaging activities, there's a lot pending work in nonsystemd
