gst-plugins-bad-libs needs a bump

Same result I have today.

Also, the gst-plugins-bad-libs package also requires to be updated against the latest version of gst-plugins-gtk and/or other related packages.

This is still an issue. I can't upgrade my PC. python-pyqt5 and gst-plugins-base-libs and friends need to be rebuilt first

Hi, has there been any movement on this? I reported it as well (<https://labs.parabola.nu/issues/3479>) and interfux directed me here. It seems to me like it is just a dependency misnomer, not a real bug or anything.

Well, I've rebuilt my gst-plugins-bad-libs and python-pyqt5 locally to fix this, thanks to abslibre git.

It seems to me like it is just a dependency misnomer, not a real bug or anything.

that is correct - both this and the 'gst-plugins-bad-libs' issue are routine, usually simple rebuilds - they simply coincided this time

see [#3480](#) for the 'gst-plugins-bad-libs' issue - that one should be fixed now
