[polkit][polkit]: unable to satisfy dependency 'js78' required by polkit

2023-06-06 08:50 AM - kovdan01

Status: fixed	% Done: 0%
Priority: bug	
Assignee: bill-auger	
Category:	
Description Currently, js78 for x86_64 is only present in community repo, which is obsolete. It's a required dependency for nonsystemd/polkit.	

History

#1 - 2023-06-07 04:17 AM - bill-auger

- Status changed from *unconfirmed* to *confirmed*

- Subject changed from *[js78] Missing package in extra repo for x86_64* to *[polkit][polkit]: unable to satisfy dependency 'js78' required by polkit*

the package is not precisely "missing" from the repos - it was dropped intentionally - the polkits will need to be rebuilt or upgraded

more precisely, the community repo is not "obsolete" but "deprecated" - it still exists; but there are zero packages available in it now - if your pacman still shows *any* packages available in the community repo, you need to run ``pacman -Sy`` or ``pacman -Syy`` - everyone will need to run the latter command eventually
