

Packages - Bug #3492

[libre/hplip] No module named 'cupsext'

2023-06-07 09:30 PM - clicker

Status:	confirmed	% Done:	0%
Priority:	bug		
Assignee:	ovruni		
Category:			
Description			
<ul style="list-style-type: none">steps to reproduce (x86_64):<ol style="list-style-type: none"># pacman -S cups# systemctl enable cups && systemctl start cups# pacman -S hplip\$ hp-setupexpected result: i expected a qt5 window to open that would allow me to set up my HP printer.actual result: instead, it prints a relatively long python error, which is attached to this issue. it's essentially just complaining about a missing module named 'cupsext'.			

History

- #1 - 2023-06-07 11:21 PM - bill-auger
- Assignee set to ovruni
 - Status changed from unconfirmed to confirmed

offhand, my guess is that it needs to be rebuilt, due to the new python 3.11 [#3487](#)
