

Packages - Bug #3497

Repos out of sync with upstream for x86_64 since about 2023-06-15

2023-06-17 09:36 AM - grizzlyuser

Status: fixed	% Done: 0%
Priority: bug	
Assignee: bill-auger	
Category:	
Description	
Very similar to the recent issues [1] and [2]. Not sure about armv7h and i686, as Arch Linux ARM and Arch Linux 32 themselves seem to be lagging behind regular Arch Linux currently.	
steps to reproduce:	
1) open https://www.parabola.nu/packages/?sort=-last_update&arch=x86_64&q=&maintainer=&flagged=	
2) compare with https://archlinux.org/packages/?sort=-last_update	
3) Remove all servers except the following from /etc/pacman.d/mirrorlist to keep only the main repo and exclude all the mirrors	
Server = https://repo.parabola.nu/\$repo/os/\$arch	
4) # pacman -Syy	
5) pacman -Ss qt5-base	
expected result:	
Step 2: maximum 1 day lag between Parabola repos and upstream repos, all upstream updates except blacklisted ones are available in Parabola	
Step 5: extra/qt5-base 5.15.10+kde+r129-1 (or newer) is in the output since it was updated upstream on 2023-06-15	
actual result:	
Step 2: it looks like Parabola repos stopped syncing correctly since 2023-01-27, because no updated packages are visible since then, while upstream has dozens (hundreds?) at the same time.	
Step 5: extra/qt5-base 5.15.9+kde+r155-1 is in the output
