[librerelease]: creates other/ directories owned by the user

2023-07-15 05:45 AM - bill-auger

Status: confirmed	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description this is probably an overlooked regression from when `librerelease` was changed to run as each user, staging in each user's \$HOME, rather than as 'repo' user the problem that causes is that no one else can publish a new libre source-ball, due to lack of permission in the target dir
