

Packages - Bug #351

[nant] won't build with [mono] 3

2013-06-21 09:37 PM - lukeshu

Status: fixed	% Done: 100%
Priority: bug	
Assignee: lukeshu	
Category:	
Description The nant build system expects gmcs to be available at {prefix}/lib/mono/2.0/gmcs.exe. As of mono 3, exes for legacy targets are not symlinked that way, but just at /usr/bin.
