

## Packages - Bug #3542

### [Extra] repo out of sync with upstream for armv7h and x86\_64 since about 2023-10-14

2023-10-15 08:55 AM - grizzlyuser

<b>Status:</b> fixed	<b>% Done:</b> 0%
<b>Priority:</b> bug	
<b>Assignee:</b> bill-auger	
<b>Category:</b>	
<b>Description</b>	
Very similar to the recent issues [1], [2], [3]. Not sure about i686, as Arch Linux 32 seems to be lagging behind regular Arch Linux currently.	
steps to reproduce:	
1) open <a href="https://www.parabola.nu/packages/?sort=-last_update&amp;arch=x86_64&amp;q=&amp;maintainer=&amp;flagged=">https://www.parabola.nu/packages/?sort=-last_update&amp;arch=x86_64&amp;q=&amp;maintainer=&amp;flagged=</a>	
2) compare with <a href="https://archlinux.org/packages/?sort=-last_update">https://archlinux.org/packages/?sort=-last_update</a>	
3) Remove all servers except the following from /etc/pacman.d/mirrorlist to keep only the main repo and exclude all the mirrors	
Server = <a href="https://repo.parabola.nu/\$repo/os/\$arch">https://repo.parabola.nu/\$repo/os/\$arch</a>	
4) # pacman -Sy	
5) pacman -Ss python-platformdirs	
expected result:	
Step 2: maximum 1 day lag between Parabola repos and upstream repos, all upstream updates except blacklisted ones are available in Parabola	
Step 5: extra/python-platformdirs 3.11.0-1 (or newer) is in the output since it was updated upstream on 2023-10-13	
actual result:	
Step 2: it looks like Parabola repos stopped syncing correctly since 2023-10-13, because no updated packages are visible since then, while upstream has dozens (hundreds?) at the same time.	
Step 5: extra/python-platformdirs 3.10.0-1 is in the output	
note:	
It looks like armv7h has the same issue.

- Status changed from in progress to fixed

thanks for noticing - the repos are in-sync now

it is the same problem - it will happen every time arch publishes a new keyring, if i do not notice so, and remember to upgrade the keyring package on the repo server - just open another bug report if you notice it again
