

Packages - Packaging Request #3544

Update python-pynitrokey to the latest available version (or at least align across architectures)

2023-10-17 09:18 PM - doolio

Status:	wont-fix	% Done:	0%
Priority:	bug		
Assignee:			
Category:			
Description			
Can we update the python-pynitrokey package to the latest version (v0.4.40) across all platforms or at the very least update the version on i686 to match that on the other architectures.			
python-pynitrokey 0.4.36-2 [community] (armv7h) python-pynitrokey 0.4.16-3.0 [community] (i686) python-pynitrokey 0.4.36-2 [community] (x86_64) python-pynitrokey 0.4.39-1 [extra] (armv7h) python-pynitrokey 0.4.16-3.0 [extra] (i686) python-pynitrokey 0.4.39-1 [extra] (x86_64)			

History

- Status changed from open to wont-fix

- Description updated

you can ignore anything in [community] - they are harmless orphans; and will be deleted soon - they have no effect on anyone's system

all packages in [core] and [extra] come from either arch, arch32, or archarm - arch, arch32, or archarm decide which versions they will be; so those are exactly the versions we want - when arch, arch32, or archarm upgrades python-pynitrokey, parabola gets them automatically

#2 - 2023-10-18 09:12 PM - doolio

Ok, thanks for the explanation. I presume the [community] repository will then no longer be enabled in /etc/pacman.conf. What about [pcr] its a community repo too, no?

#3 - 2023-10-18 10:12 PM - bill-auger

[community] was an arch repo and arch decided to retire it - all of those packages are in [extra] now

[community] is already gone from pacman.conf except for i686; but that is only because pacman will not compile now, due to the broken python environment

[pcr] and [community] are unrelated - [pcr] serves a similar purpose as [community]; but there was never any correspondence among the packages - packages in [pcr] are not available in any of the arch upstreams - the relationships between each parabola repo and each arch upstream repo is explained on the wiki <https://wiki.parabola.nu/Repositories#Overview>
