

Packages - Freedom Issue #3548

[linux] The 'linux-libre' and 'linux-libre-vanilla' packages already exists

2023-10-24 05:15 AM - eliotime3000

Status: fixed	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description In order to keep the libre kernels, the linux-libre and linux-libre-vanilla packages already exists. The 'linux', 'linux-lts' and 'linux-firmware' packages are not FSDG-compliant unlike their libre counterparts.

i dont understand - what is the issue?

is something broken or can not be installed? - ie: what are the steps to reproduce the bug?

or is this about a freedom concern? - parabola has no packages named 'linux', 'linux-lts', and 'linux-firmware' - all of parabola's kernels are made from the GNU linux-libre source

- *Status changed from unconfirmed to fixed*

Report seems to have been about the blacklist not applying, as it is tracked in [#3550](#) I'm going to close this.
