### History

#### #1 - 2023-12-19 11:45 PM - bill-auger

- Parent task set to #2047

- Status changed from unconfirmed to confirmed

- Subject changed from Update fails - qt5-webkit probably needs update for new icu version to [qt5-webkit]: rebuild against new icu (x86\_64)

yeap, the 'icu' sodeps were added to the last version - this ticket needs to be associated with the STICKY 'icu' epic ([#2047](#))

- NOTE: it is not necessary to re-build the entire chain of dependents, as each 'qt5-base' release requires ([#3421](#))
- TODO: check that the above is true, and add that note to the PKGBUILD
  - qutebrowser has no problem with it
- TODO: create new sticky tickets for i686 and armv7h

#### #2 - 2023-12-20 07:34 AM - bill-auger

- Status changed from confirmed to fixed

#### #3 - 2023-12-20 07:35 AM - bill-auger

- Assignee set to bill-auger
