

Packages - Freedom Issue #3572

[synergy]: potentially freedom and privacy invading package

2024-02-05 08:40 PM - penaiple

Status: unconfirmed	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description extra/synergy seems to have a proprietary backend, and possibly frontend. I can't find any links to any source code on https://symless.com/synergy , and the program is basically useless without the (paid and proprietary) backend subscription (SAAS).	

History

based on a cursory look-over, there is nothing obviously non-free about this - it does not even seem to require any specific server - the source code includes a client and server

#2 - 2024-03-05 06:45 PM - bill-auger

- Subject changed from *potentially freedom and privacy invading package* to *[synergy]: potentially freedom and privacy invading package*
