<pre>11:04 < mvdan> we should update libre/grub-legacy, it tries to uninstall the new libre/grub package 11:04 < mvdan> :: Replace grub with libre/grub-legacy? [Y/n] 11:04 < mvdan> (that's a normal pacman -Syu) [...] 13:32 < GuestOne> hey, with the new grub grub-mkconfig -o /boot/grub/grub.cfg doesn't work anymore [...] 13:38 < fauno> is grub-legacy replacing grub-bios? 13:38 < GuestOne> yes 13:38 < fauno> it shouldn't</pre>	
Arch solves this by not having grub-legacy, we could do the same or update it to not replace grub.
