

## Ports - Bug #360

### [partclone] 0.2.58-2 build fails, has files in sbin

2013-06-25 11:55 AM - mtjm

<b>Status:</b> fixed	<b>% Done:</b> 0%
<b>Priority:</b> broken	
<b>Assignee:</b> ovruni	
<b>Category:</b>	
<b>Description</b>	
Binaries that the new version moves:	
<pre>usr/sbin/ usr/sbin/partclone.fat16 usr/sbin/partclone.hfsp usr/sbin/partclone.fat usr/sbin/partclone.chkimg usr/sbin/partclone.ntfsfixboot usr/sbin/partclone.ext2 usr/sbin/partclone.restore usr/sbin/partclone.vfat usr/sbin/partclone.extfs usr/sbin/partclone.fat32 usr/sbin/partclone.dd usr/sbin/partclone.btrfs usr/sbin/partclone.ext3 usr/sbin/partclone.hfsplus usr/sbin/partclone.reiserfs usr/sbin/partclone.ntfsreloc usr/sbin/partclone.ext4dev usr/sbin/partclone.ext4 usr/sbin/partclone.hfs+ usr/sbin/partclone.ntfs usr/sbin/partclone.info usr/sbin/partclone.fat12</pre>	
The error:	
<pre>make[2]: Entering directory `/build/src/partclone-0.2.58/fail-mbr' cc -Wall -Werror -m32 -nostdlib -o fail-mbr.o fail-mbr.S cc: error: unrecognized command line option '-m32' make[2]: *** [fail-mbr.o] Error 1</pre>	
We probably shouldn't build fail-mbr on non-x86.	

### History

#### #2 - 2013-07-21 05:53 AM - ovruni

partclone-0.2.58-2 is released, fail-mbr is omitted:

<https://projects.parabolagnulinux.org/abslibre-mips64el.git/commit?id=4aa98809c7966d9ed78c211b6b1cb7b61fa1697c>

#### #3 - 2016-05-12 12:12 AM - Anonymous

- Project changed from 3 to Ports
