i can not reproduce this - i tried with systemd and nonsystemd, both with and without nonprism - all parabola x86_64 combinations work for me

is this about a different arch than x86_64?

can you show the output of these commands:

```
$ pacman -Qs gmtp
$ pacman -Qs flac
$ ldd /usr/bin/gmtp
```

- Status changed from unconfirmed to forwarded upstream

upstream BR https://bugs.archlinux32.org/index.php?do=details&task_id=352

i was able to get this working by installing the 'gntp' in extra-staging

try this:

```
# pacman -U https://repo.parabola.nu/pool/archlinux32/gntp-1.3.11-3.1-1686.pkg.tar.zst
```
