

Packages - Housekeeping #3621

Drop duplicate [PCR] packages

2024-03-31 10:11 AM - SolveFinder

Status: open	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description	
These packages are already in extra and should be dropped from pcr :	
<ul style="list-style-type: none">• biblesync• breeze-plymouth• cl-ppcre• font-manager• lzlib• maliit-framework• ocaml-base• ocaml-sexplib0• perl-carp-always• python-filetype• python-libusb1• python-pefile• python-poppler-qt5• ruby-haml• screenkey	
Some notes about pcr-testing/dontpanic :	
<ul style="list-style-type: none">• It should be renamed to something like dontpanic-player or dontpanic-server because perl-acme-alien-dontpanic depends on dontpanic from extra• It has a signature issue:	
<pre>error: dontpanic: signature from "André Silva <emulatorman@hyperbola.info>" is unknown trust</pre>	
<ul style="list-style-type: none">• The upstream url should be changed to https://framagit.org/prx/dontpanic because current link doesn't work anymore	

History

#1 - 2024-04-14 03:41 PM - SolveFinder

Also these packages should be dropped from **pcr/pcr-testing**:

- crosstool-ng
- freeipmi
- liblas
- pencil2d
- plymouth
- softism
- toot

#2 - 2024-04-14 10:38 PM - bill-auger

- Subject changed from Drop outdated pcr packages that are already in extra to Drop duplicate [PCR] packages

#3 - 2024-04-15 11:33 AM - wael

I'd add the following to this:

nitroshare, perl-bytes-random-secure, perl-crypt-random-seed, perl-crypt-random-tesha2.

One can obtain an up to date list by running:

```
pacman -Sl pcr | sed 's/pcr//' | cut -c2- | sed 's/ .*//' > pcr_packages
```

```
pacman -Sl extra | sed 's/extra//' | cut -c2- | sed 's/ .*//' > extra_packages
sort extra_packages > extra_packages_sorted
sort pcr_packages > pcr_packages_sorted
diff extra_packages_sorted pcr_packages_sorted | grep "<" | sed 's/^< *//' > files.diff
diff extra_packages_sorted files.diff | grep "<" | sed 's/^< *//' > files.same.sorted
```

Then files.same.sorted should have the list of duplicates.
