

pbot-ng - Bug #398

I don't know if pbot's data is being backed up

2013-08-24 02:01 PM - xylon

Status: fixed	% Done: 100%
Priority: wish	
Assignee:	
Category:	
Description I will have to investigate what backups are done on the repo server and if pbot-ng is included.	

History

#2 - 2013-08-26 01:44 AM - xylon

OK there are no backups. I might have to do some myself.

#3 - 2013-08-28 03:14 AM - xylon

I think the following things need backing up:

announcements/

info/

atom_feed_log

seen_issues_log

#4 - 2013-08-28 04:52 AM - xylon

OK, I've set up backups.

Every day, cron makes a .tar.gz of the above listed files and directories in pbot-ng's home folder, overwriting the previous archive.

Also once a day, I download the most recent archive from the server to my own computer over ssh. Then I check it's last modified time to make sure the archive was made within the last day.

#5 - 2013-08-29 05:39 AM - xylon

I've written a new bug tracker change detector so I no longer need to back up `atom_feed_log` or `seen_issues_log`.

The cron command that runs daily to make the backup is:

```
@daily tar -czf pbot-ng_daily_backup.tar.gz announcements/ info/
```
