

pbot-ng - Bug #400

pbot-ng is wasting all the bandwidth

History

#2 - 2013-08-28 06:44 AM - xylon

maybe I can use emails if I can get chilli to send emails on changes

#4 - 2013-08-28 07:04 AM - xylon

mtjm sais postfix supports delivery to programs

#5 - 2013-08-28 08:07 AM - xylon

problem is, the repo server can't receive emails

#6 - 2013-08-28 01:01 PM - xylon

If I can't make repo receive emails perhaps I can move the bot to the other server.

#7 - 2013-08-28 01:17 PM - xylon

OK I fixed postfix on the repo server by editing main.cf

#8 - 2013-08-28 01:30 PM - xylon

actually email worked already you just need to send it to user@parabolagnulinux.org instead of user@repo.parabolagnulinux.org lfacepalm

#9 - 2013-08-29 03:55 AM - xylon

I think I'm gonna turn off the pbot labs change detector while I work on it.

#10 - 2013-08-29 05:45 AM - xylon

I've implemented it and it basically works.

Only problem is that it doesn't give the bug's url when it prints it.

I've fixed it in git but I can't pull the changes onto the server because I get:

```
$ git pull
error: The requested URL returned error: 504 while accessing https://projects.parabolagnulinux.org/pbot-ng/git/info/refs
fatal: HTTP request failed
$
```

Will leave this command running for the next few hours:

```
$ while (( $? )) ; do sleep 5m ; git pull ; done
```

Maybe it will work eventually.

#11 - 2013-08-29 06:08 AM - xylon

git pull finally worked, now let's see if he notifies this update correctly

#12 - 2013-08-29 06:09 AM - xylon

OK it works
