Description NoScript doesn't show up in add-ons after installing icecat-noscript. The installation path seems to be wrong, it should be /usr/lib/icecat/extensions instead of /usr/lib/icecat/browser/extensions. I tried to move it and it works, as other add-ons are in this path too (https://lists.gnu.org/archive/html/bug-gnuzilla/2011-09/msg00021.html).

i updated a new revision of that package with installation path fixed, check if now works!

#3 - 2013-09-09 03:48 PM - jlebleu

Yes it works, thank you!
