Description			
When I click on the GNU IceCat symbol, then "Help" and then "About GNU IceCat" I don't get the about dialog as expected, but the following error message:			
XML Parsing Error: undefined entity			
Location: chrome://browser/content/aboutDialog.xul			
Line Number 45, Column 15: &community.exp.start;<label class="text-link"			
href="http://www.mozilla.org/">&community.exp.mozillaLink;</label>&community.exp.middle;<label class="text-link"			
href="about:credits">&community.exp.creditsLink;</label>&community.exp.end;			
-----^			

History

#2 - 2013-11-03 12:24 PM - johkra

I created a simple patch for the about dialog problem with IceCat 24 by merging the defined entities from Firefox. (See attached file) Note that I have patched the installed file on my computer. On a source checkout the affected file should be found in browser/locales/en-US/chrome/browser/aboutDialog.dtd

#3 - 2014-11-27 12:57 PM - Anonymous

- % Done changed from 0 to 100
- Status changed from open to fixed

It has been solved from 31 version
