

Packages - Bug #451

[iceweasel-libre] some development tools are broken

2013-12-26 02:58 PM - jlebleu

Status: fixed	% Done: 100%
Priority: bug	
Assignee:	
Category:	
Description version: 1:26.0.deb1-1 Some development tools don't work properly: - the Style sheet Editor lists stylesheets but doesn't show the editor (and so file content) - the Debugger always says that this page has no source - the Console looks a bit ugly (e.g., there is no scrollbars, no style) and selectors (Network, CSS, ...) doesn't work I don't know how to help you in solving that and provide more information and log, sorry about that.

i will check them, but in my opinion maybe those bugs provides from mozilla or debian, if you know a patch or report about it on their web pages, please let me know about it

#2 - 2014-02-09 11:34 AM - jlebleu

Last version (1:27.0.deb2-1) has fixed these issues! But I wonder if I were the only one who got those...
