

libretools - Bug #459

[libremakepkg] Also create .src.tar?(.z) files.

2014-01-06 06:05 PM - lukeshu

Status: fixed	% Done: 100%
Priority: feature	
Assignee: lukeshu	
Category:	
Description This ways, the file matches the package that was built (also, dbscripts building these is disabled--why?). Except, what should happen when building for a different architecture, and it already exists?	

History

- *Assignee set to lukeshu*

- *Status changed from info needed to fixed*

In git!

It puts the architecture name in the filename.
