Description			
Hi, When I try to update my system (pacman -Syu), I get an error message explaining the gummiboot is either corrupted or the PGP signature is wrong. You can find more details in the attached file. Thanks in advance for your help, Best regards

Try update your machine again, yesterday we have rebuilt all packages with that problem. maybe parabola.goodgnus.com.ar mirror wasn't updated yet, if the problem persists, you could comment it and use repo.parabolagnulinux.org mirror temporally then. it's on /etc/pacman.d/mirrorlist
