<b>Description</b> I used to lack of auto-unlocking with gnome-keyring on LXDE. But reading this bug report on Debian <a href="https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=709503">https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=709503</a> it seems that the package `gnome-keyring` need its file <package>/etc/xdg/autostart/gnome-keyring-pkcs11.desktop midified from `OnlyShowIn=GNOME;Unity;MATE;` to `OnlyShowIn=GNOME;Unity;MATE;xfce;lxde;`. So far, this fix works for me and I think this fix should be included in the package to ease the life of users.

- Status changed from open to not-a-bug

gnome-keyring comes from Arch. I suggest report it to <https://bugs.archlinux.org/>
