We can use this opportunity to name them iceweasel-i10n-\* and move from mozilla-testing.

Can arch=any packages use the same PKGBUILD as other packages?

Ah, that's an issue. AFAIK is not possible and that's why \*-doc packages aren't "any".

Modified the xulrunner PKGBUILD into a separate xulrunner-libre using iceweasel-libre source. Needs building for i686 and mips64el.

Built a long time ago.
