

## pacman2pacman - Bug #558

### We need a backup tracker

<b>Description</b> Currently our only tracker runs on t67.eu, but the company that hosts it has merged with another that has stricter T&Cs. "Virtora does not allow BitTorrent, you may not run any bit torrent application/script, tracker, or client, and will suspend/terminate any offending account."  So, we'd better have a backup tracker. Who wants to run one? opentracker is recommended.
