

Servers - Bug #591

A git repository is available over the rsync "repos" module

2014-10-22 10:51 PM - alfplayer

Status: fixed	% Done: 100%
Priority: bug	
Assignee: lukeshu	
Category:	
Description You can see .git/ and .gitignore like this: <code>rsync --list-only rsync://parabola.nu:875/repos/mips64el/packages/abslibre/</code>	

History

#1 - 2014-10-22 10:55 PM - alfplayer

It can also be accessed through the web: <https://repo.parabola.nu/mips64el/packages/abslibre/.git/>

#2 - 2014-10-22 11:47 PM - lukeshu

I don't know what's going on with that. The repository is clean (no uncommitted changes), and the last commit is from April 2011; before I was a contributor... so I really have no idea.

Probably just back it up somewhere in /srv/git/, and delete it from /srv/repo/?

#3 - 2015-06-16 04:40 AM - lukeshu

- % Done changed from 0 to 100

- Assignee set to lukeshu

- Status changed from open to fixed

It's just an old checkout of abslibre.git.

The HEAD commit is 19b25043d7d30462ac70906733b20a0351ae23d0, which got turned into [b51a25d7b204a0cad1de3bd8d986ae0347ae0c2](#) during the [repo-shrink of 2014-06](#).

I'm just deleting it.
