History

#1 - 2015-06-16 06:42 AM - lukeshu

It just so-happened that the specific example you chose hadn't been cleaned up by db-cleanup yet, many of them are symlinked.

I don't know why packages are being duplicated into the wrong pools.

The one with the most recent timestamp (as of 2015-06-15) is liboxr-0.1.1-3 (timestamp: 2015-06-03) being in both /pool/community/ and /pool/packages/.

So it's not an old issue sticking around, something current is doing it.
