

libretools - Bug #638

Error verifying source file signatures

2015-01-01 10:42 PM - alfplayer

<b>Status:</b>	not-a-bug	<b>% Done:</b>	0%
<b>Priority:</b>	bug		
<b>Assignee:</b>			
<b>Category:</b>			
<b>Description</b>			
<pre>  ==&gt; Verifying source file signatures with gpg...        expac-4.tar.gz ... FAILED (the public key 487EACC08557AD082088DA BA1EB2638FF56C0C53 is not trusted)   ==&gt; ERROR: One or more PGP signatures could not be verified!</pre>			
As shown on the attached file.			
The same verification seems to be done in a previous step, so I add as a workaround --skipgpgcheck to makepkg in _chrootprepare() in file /usr/lib/libretools/chroot/makechrootpkg.sh.			

History

#1 - 2015-01-01 11:07 PM - alfplayer

- Status changed from open to not-a-bug

I was missing validpgpkeys in PKGBUILD as shown here:
