# libretools - Bug #638

## Error verifying source file signatures

2015-01-01 10:42 PM - alfplayer

| Status: | not-a-bug | % Done: | 0% |
|---|---|---|---|
| **Priority:** | bug | | |
| **Assignee:** | | | |
| **Category:** | | | |

**Description**

```
   |   ==> Verifying source file signatures with gpg...
   |       expac-4.tar.gz ... FAILED (the public key 487EACC08557AD082088DA
 BA1EB2638FF56C0C53 is not trusted)
   |   ==> ERROR: One or more PGP signatures could not be verified!
```

As shown on the attached file.

The same verification seems to be done in a previous step, so I add as a workaround --skippgpcheck to makepkg in _chrootprepare()
in file /usr/lib/libretools/chroot/makechrootpkg.sh.

**History**

**#1 - 2015-01-01 11:07 PM - alfplayer**

*- Status changed from open to not-a-bug*

I was missing validpgpkeys in PKGBUILD as shown here:
https://projects.archlinux.org/svntogit/packages.git/commit/trunk?h=packages/expac&id=8fd60a4a9cfed2111ccfee04468d7d201d88259f
