

libretools - Bug #661

[dbscripts] abslibre unnecessarily copies a git repo and fails

2015-01-31 10:37 AM - mtjm

Status: fixed	% Done: 0%
Priority: bug	
Assignee: fauno	
Category:	
Description	
Log at https://lists.parabola.nu/pipermail/maintenance/2015-January/007601.html , interesting part:	
<pre>+ sync_abs_libre + '[' -d /var/tmp/abslibre/.git ']' + pushd /var/tmp/abslibre + git pull fatal: Not a git repository (or any of the parent directories): .git run-parts: /etc/cron.daily/abslibre exited with return code 128</pre>	
Why the script doesn't rsync the data from the original repo instead of cloning it (or updating, with incorrect detection of the repo being ok)?	
Remember that #635 means the server having an unversioned fork of that script.	

History

#1 - 2015-05-29 07:08 PM - fauno

- Assignee set to fauno

- Status changed from open to fixed

change it to /tmp instead, it should work as expected now
