Which version do you have installed? What is your /etc/pacman.d/mirrorlist?

This should have been fixed in [#664](#), you might be using an outdated mirror (which means that we need to fix the default mirror list and ask users to update theirs).

I'm also having some troubles with Fauno's GPG keys:

```
:: Proceed with installation? [Y/n]

I'm still experiencing this:

```
:: Proceed with installation? [Y/n]
(26/26) checking keys in keyring [#####]
#####] 100%
(26/26) checking package integrity [#####]
#####] 100%

Do you want to delete it? [Y/n] n
error: failed to commit transaction (invalid or corrupted package)
Errors occurred, no packages were upgraded.
```

Which is annoying...

have you tried setting the trust level manually?
