

dbscripts - Bug #668

[dbscripts] use set -ex and cronic in all cron jobs

2015-02-11 06:46 PM - mtjm

Status: fixed	% Done: 100%
Priority: critical	
Assignee: lukeshu	
Category:	
Description They fail and we ignore their failures. We should use set -ex in all cron jobs so maintenance mails about their failures show what exactly fails, and use cronic to get these mails only if a script fail.	

History

#1 - 2016-04-15 11:40 PM - lukeshu

- Category set to dbscripts cleanup

#2 - 2017-01-21 12:32 AM - lukeshu

- Category deleted (dbscripts cleanup)

- Project changed from libretools to dbscripts

#3 - 2018-08-09 08:11 PM - lukeshu

- % Done changed from 0 to 90

For some time we were using cronic for everything, but we have since moved to systemd timers. Now everything is logged to the systemd journal.

Timers:

- db-cleanup.timer : I'd say it does enough logging
- db-import@.timer : has adequate logging
- make_repo_torrents.timer : needs review
- update-lastsync.timer : has adequate logging (is trivial)

#4 - 2018-09-25 07:00 AM - lukeshu

make_repo_torrents wasn't even exiting non-zero if there was an error. Should be fixed in git now.

#5 - 2018-09-25 07:02 AM - lukeshu

- Assignee set to lukeshu

#6 - 2018-09-25 11:38 PM - lukeshu

Fixed in v20180925

#7 - 2018-09-25 11:39 PM - lukeshu

- % Done changed from 90 to 100

- Status changed from open to fixed
