<b>Description</b>	
<p>Running pacman <del>Sy</del> which prompts to update xorg-server to xorg-server 1.17.1 is causing trouble. It conflicts with xf86-video* drivers and is breaking Xorg or severely affecting 3D and 2D performance. Attached below is my paste.</p>	
<pre>root@jarvis /home/icarious # pacman -Su :: Starting full system upgrade... resolving dependencies... looking for conflicting packages... :: xf86-video-intel and xorg-server are in conflict (X-ABI-VIDEODRV_VERSION). Remove xorg-server?
