

## Packages - Freedom Issue #693

### No openttd-opensfx and wrong opt dependencies

2015-04-05 12:12 AM - Giedrius

<b>Status:</b> fixed	<b>% Done:</b> 0%
<b>Priority:</b> freedom issue	
<b>Assignee:</b>	
<b>Category:</b>	
<b>Description</b> First of all, openttd has openttd-opensfx as a optional dependency which doesn't exist in the repositories. Also, Openttd-opensfx has FIXME: description in the blacklist. I don't see why it is blacklisted - it's under <a href="https://creativecommons.org/licenses/sampling+/1.0/">https://creativecommons.org/licenses/sampling+/1.0/</a> this license and it's not a freedom denying license as far as I can understand. I can't find any discussion or arguments to why this was not included in the main repos of Parabola. This is a request to include it and remove it from the blacklist and fix openttd opt dependencies.

- Status changed from open to fixed

It has restrictions on modification, <https://lists.debian.org/debian-legal/2007/05/msg00094.html>, so it's nonfree. I'll update the description.
