<b>Description</b>	
Hi!	
California (calendar application) is broken at the moment:	
\$ california california: error while loading shared libraries: libecal-1.2.so.16: cannot open shared object file: No such file or directory	
\$ locate libecal-1.2.so. /usr/lib/libecal-1.2.so.18 /usr/lib/libecal-1.2.so.18.0.0	
I guess it requires rebuild to fix this (?)
