Here, the build of the latest icedove fails with the following error. Is this only for me or general? Please advise me if any. thx

---

Executing /mnt/tmp/abslibre/libre/icedove/src/comm-esr31/obj-x86_64-unknown-linux-gnu/mozilla/dist/bin/xpcshell -g
/mnt/tmp/abslibre/libre/icedove/src/comm-esr31/obj-x86_64-unknown-linux-gnu/mozilla/dist/bin/ -a
/mnt/tmp/abslibre/libre/icedove/src/comm-esr31/obj-x86_64-unknown-linux-gnu/mozilla/dist/bin/ -f
/mnt/tmp/abslibre/libre/icedove/src/comm-esr31/mozilla/toolkit/mozapps/installer/precompile_cache.js -e precompile_startupcache("resource://gre/");
/mnt/tmp/abslibre/libre/icedove/src/comm-esr31/obj-x86_64-unknown-linux-gnu/mozilla/dist/bin/xpcshell: error while loading shared libraries:
libvpx.so.1: cannot open shared object file: No such file or directory

Are you using 1:31.6.0.deb1-2 version of icedove? I replicated it in my machine and works well

**#9 - 2015-04-28 04:31 AM - taro**

Thanks. Yes, I am at commit 28dc8d322e636f0c582f680e6df69ae5d08e5851.
