

libretools - Bug #732

[libretools] librefetch tries to rebuild sourceball for signatures

2015-05-29 06:21 PM - fauno

Status: fixed	% Done: 100%
Priority: bug	
Assignee: lukeshu	
Category:	
Description when a PKGBUILD contains a missing sourceball and its gpg signature, running `makepkg -gc>>PKGBUILD` will create the sourceball but won't sign it, but run `mksource` for a second time.
