

Tools - Bug #737

[dbscripts]/[xbs-abslibre]: db-update complains when releasing split packages

2015-06-08 06:34 AM - lukeshu

Status: open	% Done: 0%
Priority: bug	
Assignee: lukeshu	
Category:	
Description	
For all but one of the split package members for each architecture, it will spit out	
On branch master nothing to commit, working directory clean	
==> ERROR: An unknown error has occurred. Exiting... /usr/bin/xbs: line 103: XXXXX User defined signal 1 "\$HELPER" release-server "\$@" ==> ERROR cd staging/XXXX//abslibre/XXXX/XXXX/XXXX && xbs release-server XXXX XXXX	
The message is harmless, but it should be fixed.	
I take full blame, and know what has to happen.
