<b>Description</b>	
I've written a script that download every single PKGBUILD and sorts them by the license tag. I have every nonfree package that my script found here:  - <a href="https://pad.riseup.net/p/nonfree_aur">https://pad.riseup.net/p/nonfree_aur</a>  (I also manually checked them)  May someone add the packages with a plus (+) to the blacklist? Also, may someone check over the packages with a (-) or (?), I'm not sure if they are nonfree.	

### History

`download` sorry for my bad spelling. Been recently using a Dvorak keyboard.

- File nonfree\_aur.txt added

I've formatted all the packages with the plus to make it easier to add to the nonfree aur blacklist. (See nonfree\_aur.txt) I'm still not sure about the packages that don't have pluses though.
