Category:	
Description	
Hi!	
California (calendar application) is broken at the moment:	
\$ california california: error while loading shared libraries: libgdata.so.19: cannot open shared object file: No such file or directory	
\$ locate libgdata.so /usr/lib/libgdata.so /usr/lib/libgdata.so.22 /usr/lib/libgdata.so.22.0.0	
I suppose rebuild will fix this.
