Description	
<pre><fauno> lukeshu` : is it possible to run mksource() on the chroot? i don't want to install ghc on my system everytime... [14:10] <fauno> also why librechroot removes the pkgbuild? <fauno> it's annoying if something fails and i have to enter the chroot to see what happened [14:11]</pre>

FWIW, since v20180804 it now runs makepkg --allsource outside of the chroot as well.
