Description it's difficult to monitor snort because it doesn't write a pidfile by default, this changes are needed: <ul style="list-style-type: none">• add a snort.conf for tmpfiles with the contents: <pre>`d /run/snort 0750 snort snort - -`</pre>• add <code>--pid-path /run/snort --create-pidfile`</code> to <code>snort@.service</code>
