

Installation Media - Packaging Request #844

Bug # 803 (open): [EPIC]: graphical installation for parabola LiveISOs

[cnchi] add as install wizard on Graphical Install

2015-10-23 02:16 PM - pizzaiolo

Status: not-a-bug	% Done: 70%
Priority: wish	
Assignee: shackra	
Category:	
Description	
Antergos maintains a very good install wizard called Cnchi, which could be used by Parabola: https://github.com/Antergos/Cnchi	

History

#1 - 2015-10-31 03:14 AM - Anonymous

- Assignee set to Jorginho

#2 - 2015-11-10 08:17 PM - pizzaiolo

Note: the installer recommends nonfree software, which is something that needs to be changed.

#3 - 2015-11-10 09:59 PM - Anonymous

- Assignee changed from Jorginho to Anonymous

- Status changed from open to in progress

#4 - 2015-11-13 11:12 PM - Anonymous

- % Done changed from 0 to 30

#5 - 2015-11-28 08:07 PM - pizzaiolo

Is the porting of this tool being done in the open? I'd like to suggest features, participate in the development process.

#6 - 2015-11-30 05:57 PM - Anonymous

- % Done changed from 30 to 60

- Subject changed from Add Cnchi as install wizard on Graphical Install to [cnchi] add as install wizard on Graphical Install

I pushed it to abslibre [0]. It needs developing yet, since po files weren't translated against our latest modifications, also we need rebrand all icons that contains Antergos stuff and re-adapt bootloader.py because our grub is very different than Antergos.

- Assignee changed from Anonymous to pizzaiolo

pizzaiolo will continue the Cnchi development for Parabola :)

#8 - 2016-02-21 06:11 AM - pizzaiolo

- File libre+rebranding.patch added

Redid the patch from scratch; Gaming4JC is working on the artwork. The grub bit probably could use your help, Emulatorman.

#9 - 2016-04-11 09:53 PM - Anonymous

- Assignee changed from pizzaiolo to shackra

#10 - 2016-04-11 09:54 PM - Anonymous

Meanwhile Gaming4JC is working on artwork, Shackra could do our logotype for it though

#11 - 2016-04-12 11:52 PM - g4jc

- File 3.png added
- File 2.png added
- File 1.png added

I made the slides a few weeks ago based on existing Parabola artwork. Let me know if you need more graphics done.

#12 - 2016-04-14 01:43 AM - shackra

- % Done changed from 60 to 70

The slides attached here, do they have any use for issue [#980](#)? I ask because <https://bitbucket.org/shackra/lightdm-webkit2-greeter/src/3ecc4e291ce61ab8990e1619f7af8ca518c5ade2/themes/parabola/img/?at=master> have three images called "screenshot1.jpg", "screenshot2.jpg", "screenshot3.jpg".

#13 - 2018-01-09 09:15 PM - bill-auger

regarding the slides: unless the greeter features a slide-show then clearly it would need only one graphic so it is not clear what the original intention of them was - they are nice graphics though and could be used in other places such as the slide-show of a graphical installer or a fancy modern-styled website landing page

regarding the 'cnchi' installer: the 2017 graphical ISOs include the calamares graphical installer which works quite well aside from it's current lack of openRC support - it may be worth a comparison but calamares seems to be better supported and does not require any FSDG patches

#14 - 2018-01-09 09:18 PM - bill-auger

- Parent task set to #803
- Tracker changed from Bug to Packaging Request

#15 - 2018-01-09 09:51 PM - bill-auger

- Status changed from in progress to info needed

#16 - 2018-06-29 06:38 AM - bill-auger

calamares now has openrc support - that seems like the best way forward now

#17 - 2018-06-29 06:38 AM - bill-auger

- Status changed from info needed to not-a-bug
